-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Paper No(s)/Mail Date. \_\_\_\_.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_.

## DETAILED ACTION

### *Priority*

1. Applicant should update the status of the parent application on the first page of the specification by amendment to include the U.S. Patent Number.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,735,387 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1, 2, and 5-15 of this application are fully contained within the claims 1-24 of the aforementioned patent. Applicant's claim 3 limitation that the motion sensor includes an infrared sensor and the claim 4 limitation that the test light includes an LED are not met by the claims of the patent. Official Notice (MPEP 2144.03) is taken that motion sensors using an infrared sensor and that LEDs used as visual indicators were well known at the time of applicant's invention. It would have been obvious to one of ordinary skill in the art to use a conventional motion detector using an infrared sensor for the motion detector of the claimed

Art Unit: 2851

patent device and to use conventional LEDs for the test light of the claimed patent device in order to obtain the desirable feature of implementing the claimed apparatus.

#### ***Claim Objections***

4. Claims 9-11 are objected to because of the following informalities: The phrase “the test light” in the last line of claim 9 should be changed to - - a test light - -, since that is the first mention of a test light in the claim.. Appropriate correction is required.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The primary reason that claims 1-8 appear allowable over said art is the claim 1 limitation that when the controller is in the testing state the controller causes the test light to blink when the motion detector is triggered but the controller does not cause the camera to take a picture. The primary reason that claims 9-12 appear allowable over said art are the claim 9 and 12 steps of placing the camera in the test state and causing a test light to activate in response to receiving the triggering signal from the motion detector.
